Student Exchange: 6 months of residence in Ireland

Work Experience

Web and Mobile Developer *at* Bonuz *from* February, 2013 *and* currently employed

        I started developing the iOS app as a freelancer, after the app was published I was invited to maintain the Ruby on Rails API and work on the Android version of the app.

Lead Developer *at* eMiolo.com *from* April, 2013 *and* currently employed

        The company just worked with PHP, so I joined with the intention of bringing new technologies. Worked with Python, Ruby, iOS, Android and HTML5 applications.

iOS Developer *at* ProDoctor Software Ltda. *from* July, 2012 *until* October, 2012

        Briefly worked with the iOS team on the development of their first mobile version of their main product, a medical software.

Web Developer *at* Ato Interativo *from* February, 2012 *until* July, 2012

        Most of the work was with PHP and MySQL, also working with JavaScript on the client side. Worked with MSSQL and Oracle databases as well.

Web Developer *at* Maria Fumaça Criações *from* October, 2010 *until* June, 2011

        I worked mostly with PHP and MySQL, also making the front end with HTML and CSS and most animations in JavaScript, although I also worked with a few in AS3. Briefly worked with MongoDB.
